

An aerial perspective drawing of a proposed urban development. A central, multi-lane road runs diagonally from the top-left towards the bottom-right. This road is flanked by rows of small, uniform residential buildings, each with a gabled roof and a chimney. The buildings are set back from the road by a narrow strip of land containing small trees. To the left of the main road, there is a small, irregularly shaped park area with a winding path and several trees. Two other roads intersect the main road at right angles: one runs horizontally across the middle, and another runs horizontally towards the bottom. The entire development is situated within a larger grid of streets, with some areas marked by dashed lines, possibly indicating future or existing infrastructure. The drawing is a black and white line art style, typical of architectural site plans or conceptual urban designs.
